### Description

IPA510 for DSAs. Basic only with enhanced accuracy. V6.3 of Design Center which contains PSpice no longer adds an entry to the PATH statement in the AUTOEXEC.BAT file. We have modified the IPA 510 SETUP to add the entry by asking you the name of the directory you installed the Design Center into. If you install it after IPA 510 is installed and install it to a directory other than the one you told the IPA 510 install you placed it in, you will have to change the PATH statement in your AUTOEXEC.BAT file.
